DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: Species I drawn to the polymer layer on the elongated core member and flexible body member in Claims 24-37; Species II drawn to the tubular polymer member having a plurality of longitudinal segments in Claims 59-64; and Species III drawn to the flexible body member comprising a polymer layer disposed about a radiopaque layer in Claims 65-85. Further, Species A drawn to the radiopaque matrix comprising a radiolucent polymer doped with a radiopaque material for Claims 33, 36, and 37; Species B drawn to the radiopaque matrix comprising an ink doped with a radiopaque material for Claim 34; and Species C drawn to the radiopaque matrix comprising an adhesive doped with a radiopaque material for Claim 35. Further, Species D drawn to the radiopaque layer being continuous in an axial direction for Claim 67; Species E drawn to the radiopaque layer being shorter in an axial direction than the flexible body for Claim 68; and Species F drawn to the radiopaque layer being intermittent in an axial direction for Claim 69. Further, Species G drawn to the radiopaque layer comprised of a material selected from a group of metals for Claim 74; and Species H drawn to the radiopaque layer being non-metallic for Claim 75. The species are independent or distinct because they reflect three different guidewire designs (I-III), three different radiopaque matrices (A-C), three different radiopaque layers (D-F), and two different radiopaque layer materials (G-H). Applicant is requested to elect one of Species I-III. If

Art Unit: 3736

applicant elects Species I, applicant is also requested to elect one of Species A-C and to disregard Species D-H. If applicant elects Species II, applicant is requested to disregard Species A-H. If applicant elects Species III, applicant is also requested to elect one of Species D-F and one of Species G or H, and to disregard Species A-C.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
